# Your 1-Page Plan

Vizdale Full-StackDeveloper Internship

| | |
|---|---|
| **Your Name** | Ranjith Kumar S |
| **Project** | MemberPass |
| **Client** | Thendral Yoga Loft, Coimbatore |
| **Who will use it?** | Members and front-desk staff |
| **Your How Might We, in your own words** | How might we simplify membership management by providing members with an easy way to access their passes and helping staff manage memberships, payments, and attendance efficiently |
| **Your tool in one sentence** | A web app for members to sign up, pay in Razorpay test mode, view a QR pass, and for staff to scan passes to check access. |

| # | 5 things a user can do |
|---|---|
| 1 | Sign up and log in to their account. |
| 2 | View membership options and select a suitable plan for your fitness goals. |
| 3 | Complete the membership registration process and activate your digital membership pass. |
| 4 | View a QR pass with plan and expiry date, and pause a plan. |
| 5 | Scan a member pass and see a green or red result with the reason. |

| | |
|---|---|
| **Your AI feature** | Own AI feature |
| **Main screens** | Member: Sign up/Login, Plans & Pay, My Pass (QR and pause). Front desk: QR Scanner, Stopped Coming list, Run Now. |
| **Made-up data you will use** | 20 fictional members with varied plan statuses; 3 plans (Basic, Unlimited, Quarterly); sample test payments, QR pass codes, visits, and webhook events. No real member or payment data. |
| **What worries you most?** | Ensuring payment signatures and webhooks are verified correctly, repeated webhooks do not extend plans twice, and the scanner always checks plan status and class limits on the server. |
